1. Comment. No essential changes appear to have occurred at the installations mentioned, except for Camp Duesterwinkelbruecke. Slight fluctuations in the occupation strength resulted from field exercises and rotations of units to Templin, and commitment in Berlin. Camp Duesterwinkelbruecke is known as quarters of the 3d Ingr Regt of the Fourth Gds Mecz Army. Although it is believed possible that the camp was temporarily occupied by other troops as long as the regiment was absent, there is no confirmatory information contained in the report. 25X1

2. Comment. Signal units were engaged in intensive training activity in the area of Eberswalde, in addition to other units which have been observed at training since July and, according to the present information, continued training at the same level until September. The present report tends to indicate that the Fourth Gds Mecz Army participated in the command-post exercise in Mecklenburg. Observations made were evaluated as follows: 25X1

Paragraphs 13 and 16: After 19 August, establishment of an operational communication net by signal troops of the Fourth Gds Mecz Army and air force troops north and south of Eberswalde.

Paragraph 32: On 20 August, briefing in the officers' club and subsequent departure of the command-echelon personnel to the bivouacking area north of Trampe.

Paragraphs 3 to 5, 13, 22, 29, and 31: From 21 August to 7 September, intensive training activity of headquarters units and signal troops at the barracks installations and in the bivouacking areas near Golzow, Pinow and Trampe.
